

Summary

I'm a professional web developer with a passion for finely crafted software and fluid user experiences. In addition to a strong technical base, I have great interpersonal and communication skills honed through years of experience in the business world. I'm also an amateur musician who enjoys the parallels in the creative acts of composing music and software. As a graduate of the Web Development Immersive course at General Assembly, I am looking for full time work in the Seattle area that will help me grow as a developer and build harmonious products.

Education

General Assembly, Web Development Immersive

Full-Stack Web Developer

2014 - 2015

- Developed a back-end web application and APIs using JavaScript, Node.js, Express and MVC development framework Ruby on Rails.
- Created dynamic front-end single-page apps using AngularJS.
- Leveraged Agile development workflow, and widely-accepted collaboration practices using Git, to work within multiple teams in a high production environment.

Projects

Seahawkcity.com

- Seahawks themed app built with Ruby on Rails, including Google Maps, Cloudinary and Ruby Geocoder APIs.
- Constantly pushed and merged code to Github while working in a fast-paced production environment.

Clockswap.com

- E-commerce website for luxury wrist watches that allows users to sell their own collection built on Node.js, AngularJS with Cloudinary API and MongoDB.
- Solo project built in one week that is ready to be launched as a real-world retail application.

Work Experience

Ashford.com

Sales Manager/Product Specialist

2008 – 2014

- Trained all agents to develop better communication and presentation skills with customers.
- Built a portfolio of repeat clients with annual sales of more than \$5 Million.
- Educated clients in mechanical watch engineering to help them make informed purchases.
- Led executive marketing strategy and site analysis meetings.

Dubseed.com

Front End Developer

2014-2015

- Worked directly with product manager to build fully responsive frontend user interface.
- Used Bootstrap, CSS3, HTML5 & Angular together to create a modern, extremely fast frontend with no page reload.
- Controlled data flow between backend and frontend by using Angular's powerful binding methodology.
- Created frontend validations to send realtime feedback to users.

Skills

Technical

HTML5, CSS3, JavaScript, Node.js, AngularJS, MongoDB, Express, Postgres, JQuery, Bootstrap & Github

Business
